

Quantum Murray LP – Canada’s leading decommissioning service provider

Quantum Murray LP is Canada’s leading full service environmental and decommissioning contractor offering services in demolition, scrap metal and salvage, hazardous materials abatement, remediation, waste management services, treatment of soil, water and other waste materials

Fast facts

Corporate profile

As Canada’s leading demolition, environmental remediation and hazardous waste materials management company, QMLP provides crucial solutions to waste management issues. Founded in 1992 the company now employs 1000 people in offices across Canada.

Why Ottawa

Quantum’s CEO Jeff Westeinde is a big believer in Ottawa, the place many of his employees call home. Acknowledging that his company relies on high technology solutions to environmental problems, he serves on the Board of Directors for the Ottawa Centre for Research and Innovation (OCRI) – Ottawa’s leading member-based economic development corporation for fostering the advancement of the region’s globally competitive knowledge-based institutions and industries.

Business advantage

Over the years, Quantum’s team has handled thousands of demolition and hazardous materials projects, ranging in scope from mould remediation and decontamination in single family homes in remote, First Nations’ communities, to such diverse projects as the expansion and renovation of international airports and the removal of asbestos and other toxic materials from large shopping malls, hospitals and schools.

The Western hemisphere’s rapid de-industrialization along with growing public awareness of environmental issues, tighter regulatory controls, and a concern over the effect that toxic materials have on human health, has focused attention on the safe decommissioning of former industrial and commercial sites. As Canada’s leading demolition, environmental remediation and hazardous waste materials management company, Quantum Murray LP (QMLP) provides crucial solutions to waste management issues. Founded in 1992 the company now employs 1000 people in offices across Canada.

QMLP Hazmat division provides proven expertise and a reputation for excellence in asbestos, lead, mercury and PCB abatement and disposal, as well as mould remediation. Quantum specializes in the safe and effective management of a wide range of contaminants found in commercial, residential, industrial and institutional buildings. QMLP’s Demolition division provides turn-key demolition and decommissioning solutions throughout Canada.

The company is also recognized nationally as a leader in the clean-up and rehabilitation of commercial and industrial sites and facilities. As part of its overall environmental remediation and hazardous waste management programs, Quantum operates several waste management facilities to treat and dispose of waste materials from a variety of commercial and industrial sites. Fully permitted, licensed and insured, each facility is carefully engineered and monitored to protect the surrounding environment, and meets or exceeds industry standards. Water treatment and hazardous emergency response round out the company’s services offerings.
